Price: \$12.79

Description

Includes: 1 Bottle of Salt System Test Strips(10 Tests)

AquaChek, the world's leading brand of Pool & Spa test strips, is as accurate as liquid kits, but faster and easier to use.

Directions:

1. Dip and remove strip in water sample.
2. Wait 15 seconds.
3. Compare pads to color chart on bottle.

Salt

A chlorine generator uses sodium chloride (Salt) to make Free Chlorine. The generator converts the Salt to the Free Chlorine that will sanitize your pool, killing bacteria and microorganisms in the water. A proper level of Salt will ensure that a properly functioning generator is able to produce the desired amount of Free Chlorine to keep the

water free of contaminants. To ensure the adequacy of your sanitizer levels, test your Free Chlorine levels 2-3 times a week.
